CANVAS Workshop Lausanne

Ethical dilemmas in strategical and operational cybersecurity at State level

> May 13th & 14th 2019

CANVAS

UNIL | Université de Lausanne

Ecole des Sciences criminelles

Program | Monday, May 13th

| Session I Amphimax 414 | Ethical dilemmas for pen-testers and operators of critical infrastructure |
|----------------------------|-----------------------------------------------------------------------------------------------------------------|
| 09:00 | Welcome David-Olivier Jaquet-Chiffelle and Olivier Ribaux (ESC, University of Lausanne) |
| 09:30 | Ethics and Pentesting Melanie Rieback (Radically Open Security) |
| 10:15 | Intelligence Vulnerability Management, Databases & Models Benjamin Kunz Mejri (Evolution Security) |
| 11:15 | Rendez-vous techniques: the weakest link? The example of the DNS. Stephane Bortzmeyer (AFNIC) |
| Session II Amphimax 414 | Ethical dilemmas during technical reaction |
| 13:30 | Ethical challenges in incident response Freddy Dezeure |
| 14:30 | Ghost story Tomi Tuominen (F-Secure) |
| 15:00 | Ethical and legal dilemmata during operations against APT groups Reto Inversini and Andreas Greulich (MELANI) |
| | Anthropole 1031 16:30 Keynote |

Workshop May 13-14 Lausanne, Switzerland

Cyberpeace requires Free Software

Richard M. Stallman (The GNU Project)

Program | Tuesday, May 14th

| Session III Amphimax 414 | Protecting values in strategic plans for better cyber security |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| 09:00 | Building national Cybersecurity Strategies: democratic challenges Manuel Suter (National Coordination Center, CH) |
| 09:45 | I hacked the Dutch government and all I got was this lousy t-shirt Nouschka Auwema (NCSC-NL) |
| 11:00 | AI: Is it a fair play on software security? Juha Röning (University of Oulu) |
| Session IV Amphimax 414 | Enforcing the law in cyberspace |
| 13:30 | Enforcing data protection in cyberspace : Challenges and strategies Harald Zwingelberg (ULD Schleswig-Holstein) |
| 14:15 | Cybercrime - possibilities and limitations of penal prosecution Stephan Walder (Staatsanwaltschaft II des Katons Zürich) |
| Session V Amphimax 414 | Approaches for knowledge-based collaborative solutions |
| 15:30 | 1 + 1 = 3 ? Experiences with Fostering Collaboration in Cybersecurity Daniel Plohmann (Fraunhofer FKIE) |
| 16:00 | Securing the State & the People in Cyberspace - An ethical dilemma or just a big misunderstanding? Martin Dion (Kudelski Security) |

Workshop Abstract

Our international workshop on «Ethical dilemmas in strategical and operational cybersecurity at State level» in Lausanne, Switzerland will begin with a focus on ethical issues in day-to-day operations for penetration testers, operators of critical infrastructure, and CERTs providing technical reaction to threats. Towards the end, we will broaden the scope to furthermore look at value-driven creation of new regulations and standards.

The Canvas Project

This international and interdisciplinary workshop is part of a series of events organized by the Horizon 2020 project CANVAS. The goal of CANVAS is to inform deciders and policy makers about issues at the intersection of ethics and cybersecurity by creating brieng packages, whitepapers, and materials for teaching (MOOC, reference curriculum, and a book).

Our event brings together scholars and practitioners. This includes actors who need protection for themselves or for their organization as well as those who have to deal with the consequences of untraceability and online anonymity.
